Field Construction

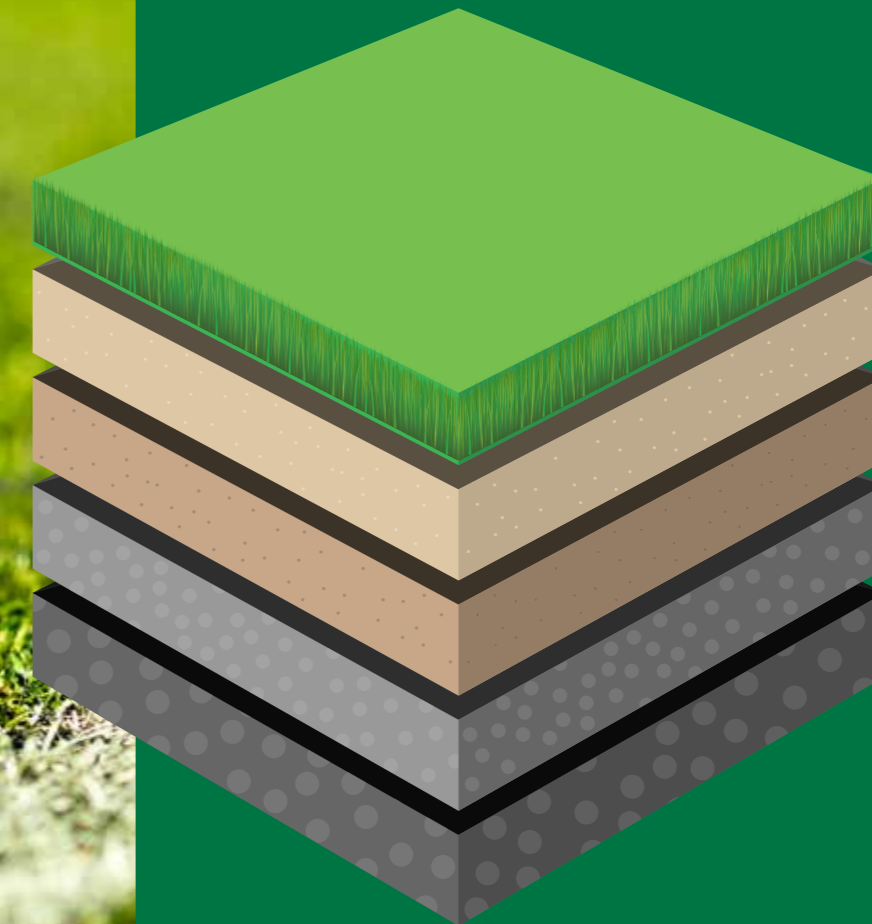

We know how important the ground of the field is in order for the sportsmen camping at Emir Sport Complex to achieve their condition and train in the most efficient manner. Therefore, we apply the best drainage systems.

With drainage systems complying with international standards, we provide uninterrupted and efficient training conditions without any puddles on the fields even in the most rainy days of the season.

The maintenance of the fields at Emir Sport Complex is undertaken throughout the year with programmes which are prepared monthly according to the regions micro climate. These programmes include fertilizers, micro elements, miscellaneous nutrients and chemical products which vary according to seasonal climate conditions.

By applying these maintenance programmes efficiently and regularly, we offer our guests suitable fields and training areas all year round.
